2.5.3 Consolidated report on information on examination reforms:

Over the past five years, the university has overhauled its examination and evaluation processes: Internal assessment and attendance records for each subject are now submitted via the university's online portal. Students can view examination fees for each subject on the institution's portal and are required to make payments via NEFT/RTGS before the specified deadline as per university guidelines. Once submitted online, this information is forwarded to the university, after which hall tickets are generated and distributed to students following verification by the Principal. Additionally, the exam timetable is now readily accessible for students, displayed prominently on the college notice board.

As per the university's directives, CCTV cameras, metal detectors, and mobile jammers have been installed in the examination hall. Students are thoroughly briefed on examination regulations and the consequences of any misconduct. The process of accessing question papers is fully automated: the chief superintendent must log in to the university website portal using a designated ID and password 15 minutes before the exam begins, and then photocopies are made as needed. Additionally, examination hall CCTV cameras and cellphone jammers are activated 30 minutes prior to the start of the examination.

The chief superintendent and invigilator are responsible for documenting all activities in the examination hall from 30 minutes before the start of the exam until the completion of packing and sealing the answer book bundle. This entire examination process is meticulously recorded onto a CD, which is then promptly dispatched to the university on the same day, along with the answer book bundle. Since 2018, on-screen evaluation of answer papers has been conducted at the evaluation center located in The Tamilnadu Dr. MGR Medical University, Chennai.
