### HAND WASHING TECHNIQUE

Hand-washing is an easy way to prevent infection. Frequent hand-washing is one of the best ways to avoid spreading the infection to others. To improve hygienic care and to make the environment free from infections.

## SIDE RAMP FOR PATIENTS

Ramps serve the vital purpose of offering a gradual incline that makes it safe for the user to roll up the ramp and keep the patient safely positioned on it during transit to avoid falls.

## AUTOCLAVE

Hospitals utilize autoclaves to eradicate dangerous spores, viruses, bacteria, and fungi. They are employed to sterilize media, tools, and lab ware as well as to decontaminate specific biological waste.
